

Dr. Brent Boyett

is dually trained and practices both Family Medicine and Family Dentistry. He completed his undergraduate education at Birmingham-Southern College.

He then graduated from the University of Alabama at Birmingham in 1994 with a D.M.D. degree. Working during the summers and on weekends in dentistry he went on to medical school at the University Of Health Sciences College Of Osteopathic Medicine and graduated in 1998. He then began a three year Family Medicine Residency with the University of Mississippi in Tupelo, which he completed in 2001. His emphasis during this training was internal medicine, anesthesia and oral surgery.

He is a Diplomat of the American Academy of Family Practice and the American Dental Society of Anesthesiology, which allows him to offer sedation and general anesthesia to oral surgery patients and patients with anxiety associated with dental procedures. His dual training is an enhancement to both his medical practice and dental practice.

He has added many new advances to his clinics in the last year to enhance your visit, which include medical and dental software that will lead to an electronic paperless office. The dental office has added cutting edge digital x-ray, Cerac one visit crown and veneer machine which requires no impressions or temporaries. We have added a Picasso laser to enhance our treatment regimen in regard to, gum surgery, oral surgery and tooth whitening.

Sedation dentistry is the art and science of treating patients who fear the dentist for a variety of reasons. **Dr. Brent Boyett** will take into account your past dental problems and your medical history to prescribe an oral sedation or recommend intravenous conscious sedation. You will have little or no memory of the procedure and up to 24 hours after the procedure.

Q Who is a candidate for sedation dentistry?

A People who
have-high fear
traumatic dental experience
difficulty getting numb
sensitive gag reflex
high stress level associated with dental procedures

Q Will I be unconscious?

A No, you will be deeply relaxed but in control of your breathing and you will be responsive to verbal commands.

Q will I be monitored?

A Yes, You will have oxygen saturation and vital signs monitored. At least one of our trained team members will be with you at all times.

Q How long will I be sleepy?

A You may nap through the entire day and into the night.

Q Will someone need to accompany me?

A Yes, you will need a driver and someone to stay with you at home the rest of the day.

Sandra Boyett

completed the certified registered nurse anesthetist program at the University of Alabama at Birmingham in 1994 and moved to Jackson TN.

There, she worked for the Jackson Clinic as a staff anesthetist until she took a position at the University of Tennessee in Memphis ("The Med") where she gained valuable experience in Trauma anesthesia.

She administers conscious sedation to patients at Boyett Health Services for oral surgery and for anxiety control during routine dental procedures. There is a doctor and an anesthetist present for all conscious sedations at our clinic.

Her clinical contributions to the delivery of care at our clinics are another aspect that makes Boyett Health Services unique.

**We are one of a handful of dentists
in our area that are licensed in oral
and conscious sedation.**
